PRESS RELEASE

Muon Electric boosts its position towards a leading green power utility in Portugal

Smartenergy on its way as an integrated full value chain investor in renewable energy

Wollerau/Porto, 1 December 2020

Muon Electric has taken over renewable energy PPA's up to 500 GWh per year from PH Energia (Energia Simples). With this, Muon secures its supply chain and continues to strengthen its position towards becoming a leading supplier of green energy on the Portuguese market. Muon is wellknown for its innovative and competitive offering to deliver renewable energy to the industry and to private households.

The Swiss-based Smartenergy Group, already holding a majority in Muon Electric, acquired the remaining stake and thereby took full ownership of the Portuguese energy trader.

For Smartenergy the acquisition is a further step towards vertical integration and broadening market access for renewable energies, not only for electricity from solar and wind production, but in the future also for green hydrogen and synthetic fuels. It underlines Smartenergy's commitment to becoming a fully integrated new generation energy supply investor.

Smartenergy

We are a Swiss-based investment company dedicated to renewable energy. We identify, develop and deliver green energy assets. We are a driving force in the ongoing transition of the industry towards green energy being focused on the deployment of solar, wind and green hydrogen projects. We are committed to pursuing the potential of hydrogen and related technology as an ideal complement for utilizing and storing renewable energy.

Smartenergy, founded 2011, is headquartered in Wollerau, Switzerland. Beyond our Team in Wollerau, we rely on our own local subsidiaries in all major markets in Europe.
